2024-2025

Who Are We?

Citrus Racing is the Formula SAE Team at Syracuse University! Each year, our group of dedicated students design, build, and test a new open wheel race car. All of this hard work is then put to the test in a yearly competition where teams from all over the world come together at just a few venues to present, inspect, and race their cars to see who will come out on top!

This past year, our team made Syracuse history by bringing the most sophisticated, reliable, and fastest car our program has ever produced to competition at Michigan International Speedway! This was no easy task but we believe with the commitment of our team members, and the support from the right sponsors, we can become a consistently successful team that other university's Formula SAE teams can aspire to compete against!

This is where you come in!

Why Join the Team?

Citrus Racing is proud to represent your brand as none of our efforts would be possible without the support of our sponsors! As a sponsor of Citrus Racing you gain exposure to up and coming engineers as well as promotion on our car's livery, team apparel, and social media. Last but certainly not least, donations to our organization qualify as 501-3c tax deductible!

Sponsorship Levels

Silver

Sponsorship Value

\$100+

Benefits

- 3"x5" logo on livery*
